Sworn to no Master, of no Sect am I. THE BANK RETURNS.

No. I.-LIABILITIES. In examining the General Abstract of the Bank neturns for the past quarter, it is necessary that we should repeat the observation so frequently made beforenamely, that as the Returns of the Bank of New South Wales include the transactions of the Branch in Victoria, while those of the other Banks include only the transactions within our own colony, the great difference between their respective amounts, in some instances as three to

ne, must not be taken as a criterion to their relative extent of business. We do hope this unfair and unsatisfactory state of things will be remedied during the present session of Council. The General Abstract for the quarter ended 31st March, 1853, compared with

ters, shows in round numbers the We must premise, however, that in the last quarter's Abstract the returns of the Australian Joint Stock Bank appear for the first time, that Company having been e-tablished since the commmencement of the current year.

added to our paper currency upwards of £100,000, or more than one-eighth; and within the last twelve months nearly half a million, or almost double. For every £100 of Bank Notes in circulation three months ago, there is now £112; and for every £100 a year ago, there is now £192.

Both in the quarter and in the year the circulation has increased in all the Banks, the Joint Stock being of course excepted from the comparison.

provisions which have been considered bjectionable. All subjects of Foreign States are to be dealt with precisely as British subjects. Clergymen, persons in government employ, and servants, are not to be called upon to pay license fees in respect of residence. The enactment respecting runaway servants and apprentices is to be repealed, but a conviction in due course of law of having absconded from hired service is to forfeit license. Parties may prospect without licenses in places which have not been proclaimed as gold fields. There is a short clause against sly grog selling, and authority is to be given to the GOVERNOR to issue public-house licenses on certificates of one Gold Commissioner and one other magistrate. This we believe is the substance of the different clauses in the proposed Bill.

TAHITI.

We have files of the Messager de Tohiti to the 10th April. We observe nothing of particular interest in these papers. The Government of the Protectorate appear to be taking vigorous measures for enouraging the cultivation of fruits and vegetables by the natives; and a considerable trade was growing up between Pepeeti and the interior for the supply of vessels touching at that port. The natives are beginning to be alive to the advantages of regular occupations. The Government crusade against the upa upa dance continues.

FROM OUR LONDON CORRESPONDENT.

London, December 18, 1852. The year has not been allowed to terminate without another Ministerial crisis. The division on Thursday night on Disraeli's Budget was of course followed on Friday by a short Cabinet council, and the rapid departure of Lord Derby for Osborne. Here we are, on the Saturday, of course, still in the midst of conjecture as to what ministry will succeed Lord Derty's, or whether any arrangement can be made for keeping in power the Conservative par'y, by far the most powerful single party in the two Houses of Parliament.

blenday, I suppose, will tell us into whose hands the administration will be placed. The Daily News of to-day gives us a conjectural Cabinet, with Lord Lansdowne as Premier Lor | John Russell, Hems Feeretary; Mr Gladstone, Chancellor of the Exchequer ; and Sir James Graham, Secretary for the Colonies. When we knew for a certainty the new ministerial arrangements, the antecedents of the new Colonial Secretary as respects colonial questions will be matter of interesting enquiry. At present I may appropriately comment on the conduct and policy of Sir Jo'n Pakington, during his ten months' possession

office.

It has been remarked of the Whigs that their professional liberality while in opposition gives place to a good deal of Conservative temedity who in Office; but no doubt the same observation applies with more or less face to every party of progress, when they exchange the irresponsible function of finding fault for the cares and smittetes of administration. The Tories, on the other hand, have been said to grow more liberal than their professions from the moment they got possession of power. Here we have lately had an old reformer as Lord Chancellor, who was the greatest enemy of all rational law reform while holding the Great Seal; but he is succeeded by a severe old Tory, supposed to be another Eldon as respects his admiration of the past, and he has proved himself the most practical Edd-n as respects his admiration of the past, and he has proved himself the most practical law reformer of the age while at the head of the legal administration. So Lord Grey was always pointed to as the great colonial reformer—the men of ultra Whig liberality; the man of whom that fine

traisais, that of the Union has scarcely increased at all.

So we have Sir William Moleswrth in the ministry,—a guarantee, one would say, for a liberal colonial administration. The Duke of Newcastle, the new colonial minister, las been known for some years past to take a warm interest in all colonial questions, and the bias of his politics (especially for a Duke) is considered to be decidedly most liberal. Mr. Lowe, you will perceive, has soon had his abilities recognised

Mr. COWPEN: Having already given notice to the honorable gentleman at the head of the Government, he begged to ask whether it was the intention of the Government to bring in a Bill during this assion to amend the present Act for the Incorporation of the city of Sydney?

The COLONIAL SECRETARY: In answer to the question of the honorable may be a present.

The COLONIAL SECRETARY: In answer to the question of the honorable member for Durham, he would state for the information of the House, that it was not the intention of the Government to introduce any Bill to amend the Corporation, and the reason was this. It would be in the recollection of hon, members that the matter was before the House last season, but the Bill then introduced was allowed to lie over in consequence of addresses to the to lie over in consequence of addresses to the Governor General and the Council, adopted at Governor General and the Council, adopted at public meetings of the citizens, deprecating the disfranchisement of the city; and as no expression of opinion on the other side of the question had been made on the part of the citizens, the Government felt that it would be placing themselves in an invidious position should they take any steps for disfrarchising the city. He fully admitted the evils which at present existed, and, as a citizen himself, no one would be more glad than he should be to see a better system of municipal government

LIGHTHOUSE AT CAPE HOWE.

In answer to a question from Mr. CAMP.
BELLI,

The COLONIAL SECRETARY said that steps had been taken by the Government in reference to the important question of establishing a light-house at Cape Howe, and a gentleman from the Colonial Architect's Office had been sent down to examine the site, who had made an elaborate survey. The reports of this gentleman had been submitted to Captain King, whom the Government were in the habit of consulting on such subjects, and who was a great authority on such matters; and they had come to the conclusion that Gabo Island was the best and most desirable site for the erection of the intended light-house. The principal object would be for the guidance of vrasels going to the westward, since those leaving Sydney for the southward and eastward were guided by the line of coast. He had also been in cemmunication with the Government of Victoris on the subject, and that Government had offered their co-operation and assistance in carrying out the object. He had also conferred with Captaia Denham, of H. M. S. Herald, a great authority on light-housee. It had been resolved to make a proposal to the Government of Victoria, within whose province Gabo Island was included, namely, that the expense of erecting and maintaining the lighthouse should be equally divided between the two colonia; and he (the Colonial Secretary) proposed to write home by the first opportunity directing a proper tower or pillar of iron to be sent out. The House was aware that a lantern and lights of the first quality, were already in the colony, and he therefore did not anticipate any lengthened delay in the completion of the undertaking. (Hear.)

NOTICE OF SOTION.

1. Mr. MARTHY to move, (1.) That in the opinion of this House the time has arrived when the most prompt and vigorous steps should be taken to permanently construct the following leading thoroughtress of the colony, viz. (1.) The Great Nestern Road from Penrith to Bathurst. (2.) The Great Northera Road from Penrith to Bathurst. (2.) The Great Northera Road from Penrith to Hathurst. (3.) The Great Northera Road from Penrith to Hathurst. (4.) The Great Northera Road from Penrith to Hathurst. (2.) The Great Northera Road from Camden to Goulburn. (2.) That the sum of £100,000 onght to be at once appropriated for such purpose, to be applied in equal portions to the above roads. (3.) That the expenditure of such moneys should, instead of being spread over the whole of the said lines, be concentrated on limited portions, in order that the work may be performed in a durable manner, and upon scientific principles. (4.) That such works should be carried on by contract, but under the supervision of competent officers, to be appointed for that purpose.

LICENSING MEETING.

LICENSING MEETING.

TUBLAY.

PREMENT The Police Magistrate (in the chair), Mr. Broughton, Mr. Hill. Mr. Daniel, Mr. Murnin, Mr. Wingste, and the Water Police Magistrate.

Mr. Brenan, on behalf of Mr. Luke Ryan, who bad purchased of Maurice Walsh the stock in trade, lease, &c., of the Bee Hive, Campbell-street, presented a petition, numerously signed, the prayer of which was that the Justices would recommend Ryan to his Excellency the Governor-General for a special license. Their Worships were of opinion they could not entertain the application.

In the matter of the application of Robert Thomas Carter, York street and Erskinestreet, the Water Police Magistrate opposed the application: he had nothing to say against either the character of the man or the accommodations of his house, but he thought it improper to license any house as a public house in such a place as Wynyard-square, a place set apart particularly for the recreation of the respectable children of the city. Mr. Hill thought the objection a very innocent one. This applicant had purchased the land and built his louse for the express purpose of keeping a house of accommodation, and as the Government had made no restrictions in the conditions of sale, nor the residents made any objection, it would be an act of injustice to refuse the application on such a ground. The Police Magistrate thought that if the respectable people of Wynyard equare spoken of by Mr. Brenan had had any objection to a licensed house in their vicinity, they would have come forward themselves. The question was put to the vote: Ayes—Messre, Broughton, Hill, and D. niel; Noes, Mr. M. Wingate and the Water Police Magistrate; Mr. Murnin declined to vote. License granted.

Mr. Nicholes, on behalf of John Roden, whose application a few days alone, was rejected by a majority of the Bench as then composed, applied for leave to repeat his application, on the ground that one of the adverse justices on the former occasion was disqualified by law from sitting as a licensing

Suburban Largentes.—The residents in the various suburbs, especially these in the vicinity of the Glemmore and Old South Head Roads, continue to complain grievously of the wholesale demolition of their palings and fencing, as well as of the trees and shrubs in their grounds and gard re, thus throwing the mopen by day as pasture land for pigs and grats. Night after night poultry, fuel, and other necessaries are atolen from the premises of all who have them, whether rich or poor persons. As there are no watch-houses, or even single room stations, the one or two plicemen cannot act without warrant on information. At all events they have failed to discover one out of scores of such rob beries during the past two months. They would indeed appear to belong only to the mein read during night; so that, under the present arran ements, the district can do without them. The suburbs will very shortly because better known to the authorities and the public generally as the dwelling place of thousands of all classes; not merely the 900 electors! It is becoming a very general opinion that the building operations in the city and suburbs are delayed, not so much for the want of hands as of materials. So far as this relates to timber, there is no doubt a great scarcity of sawyers and splitters. The wages of sawyers, it is said, vary from £3 to £4 a week—many gain more than that sum. Now, considering so much timber is to be had within twenty miles of Sydney, and mostly water carriage from such places as Lane Cove and Brisbane Water, it is certainly strange the trade is not better supplied. supplied.

Heed's Croek, Yacandanda, and the other satisfies, are now almost wholly descreed, but it is a very prevalent opinion that with the approach of summer they will be resumed by a larger population, and that many thouse of them. I think it is very likely that the fats or basins in the Yacandanda Croek will yet be worked by companies under the clause in the new regulations which allows of five-acre claims. Although a great deal of gold has been taken out of some freetensly worked in consequence of a superabendance of water. They have always been impracticable to small parties, and those parties who were strong enough to work them have always preferred the wet diggings at Reed's Croek.

I should say there are not more than three or four hundred persons on both these creeks, but I believe the majority of them are making considerably more han wages. At Reed's Creek there are a few puries doing pretty well at the dry diggings, but these appear to have been nearly worked out, and I think it is very likely they will be abandoned altogether in the course of another week or two. To show how sich these diggings have been, I may mention that there is a number of persons who seem very good wages by what is called "cayotering," that is, by going down old holes and raking out of the tunnels whatever washing stiff may have been left.

At Spring Creek some new ground has been the head of Madman's Guily, and

at Spring Creek some new ground has been upned near the head of Madman's Guily, and as the south-east s de of Pennyweight Flat, which is likely to turn out well. The sinking is between twenty and thirty feet, and the yield per load, so far as it has been ascertained, is between three and four ounces, which will allow of considerably sore than average profit. The old diggings on Pennyweight Flat have been almost forsaken, and the few claims that which worked do not much more than pay the old ungains been almost forsaken, and the few claims that are being worked do not much more than pay for the time and labour employed on them. The shafts are very deep, some of them being spunds of fifty feet, and, as the tunnels ground may be said to be completely ground may be said to be completely undermined, in consequence of which the deep holes are surject to a constant draining of the accumulated rain water from the old holes would. This makes the claims here very tedious and difficult to work, and unless they are unusually rich they will not pay for the time and labour expended on them.

In the accounts from Nine Mile Creek, the

time and labour expended on them.

In the accounts from Nine Mile Creek, the shief feature of interest is the formation of companies for the purpose of working five-acreclaims, in pursuance of a clause in the new regulations. Altogether, I believe there are about five or six of these companies established, four of which have made the necessary deposits with the gold commissioners, and commenced operations. None of their applications, however, have been formally granted, owing to a doubt in the mind of the sommissioners as to the brecise meaning of one or two words in the regulation referred to. By this regulation the five-acre claims are restricted to ground either "abandoned or partially worked," and the

The melancholy intelligence arrived at Spring Creek yesterday that H. W. H. Saythe, Eq., Commissioner of Creew Lands for the Ovens district, was drowned whilst attempting to cross Broken River on Sanday last. I have not been able to gather any particulars as to the cause of this unfortunate accurrence; but it appears that he was on his way to the station, which he intended to visit for the last time prior to his departure for Bagland, under a two years' leave of absence recently granted by the Lieutenant-Governor. He seems to have carned some popularity in this part of the country, and I have no doubt his death will be very generally regretted. Another accident occurred a few days ago at Nine Mile Creek. A digger was shot by his matternough the body, and was so everely wounded as to render it exceedingly doubtful whether he will recover. The accident occurred through attempting to clean a revolver, in ignorance of its being loaded. Some slight accidents have coccured at Spring Creek through the falling in of tunnels, but none of any serious consequence. A man was severely injured the other day from the falling of a backet of stuff on his head. He was at work at the bottom of a shaft about thirty feet deep, and the accident was caused by the slipping and the accid

ear, and I assert it on my knowledge of what "Mechanics Institutions" are in the mother country, that no one institution of its kind is better managed, either by Committee r Libraran than that of Pitt-airest, Sydney. No one who has any personal knowledge of the library or reading rooms but will accord to Mr. Manafield the fullest praise for the r internal arrangement and management, and bear testimony to his urbanity, his unceasing attention, and his general ability. I am at a loss how to conceive that a library (in an infant colony) which contains over 4000 volumes, and comprising some of the most valuable and approved standard works of art, literature, and science; a reference room, containing, among other very rare and valuable works, all the Colonial Journals from 1819 to the present day; the Government Gasetts from 1843; the Council Papers from 1843; Callahan's Acts of Council; Encyclopedia Brittanica; Greek and other Lexicona; Goold's Birds of Australia, complete, &c., &c., or even an "uncatalorued enlection of unappreciable feasies in.

respectable a class of passengers as will be met with in most passenger ships carrying large numbers; and yet how prievous the disappointment—how painful the voyage! arising from the owners making a mere matter of business of that which bore the character of a religious system; taking, without eaquity or objection, any person who offered, so long as they were able to pay their passage-money. And such will be the case with other vessels consing out under the same system. The Hyderabad was (as I am informed) far worse in all respects than the Chandernagore.

As there were very many complicities on board, many of which were not justifiable, I think it right, in justice to the owners and brokers, to state that we had a fine strong vessel, which was very clean and roomy; that the provisions were very good, and seconding to the scale given; and that the captain (Edwards) was a most careful, kind, and worthy man; and that the chief officers were gentemen worthy of their position, and generally exteemed.

It is certainly desirable that we should have a large influx of religious and moral people from the old country. The state of society here demands it; and I think that a plan might be devised that would facilitate such a desirable end. But I do not think the present system of "select" or "Christian" emigration is calculated to effect that object, but rather to bring ridicule upon religion.

system or "searct or Currents of the college of the

tions of the company, as well as that a double instead of a single trunk line of steam communication, semi monthly in place of monthly, is to be maintained between Southampton, India, and China, and a branch packet, in correspondence with the main line, is to run every two months between Sigapore and Australia, thus affording, via Singapore, six communitations each way yearly between England and the Australian colonies. Besides this, the Maitta and Marseilles portion of the mails rvice heretoface performed by Government at amers, will be accomplished by vessels of the Peninsular and Oriental Company.

The details connected with the extended service, which have recently been published, are very voluminous. According to the arrangements therein made, the In is and China mails are to be deputched from Southapton on the 4th and 20th of every month, but there will be no outward mail on the 4th January, the scheme only taking effect from the 20th proximo inclusive. The first homeward India and China mail, under the new contract will be due at Southampton on the 20th February. The schedule of routes and distances published by the Peninsular and Oriental Company subdivides the intended operations into four distinct lines and one branch line, viz.—

No. 1. Southampton to Gibral ar, Ma'ta, and Alexa dris.

2. Suez to Aden, Ceylon, Madris, and Calcutta

3. Bombay to Ceylon and China, via

3. Bombay to Ceylon and China, via

Calcutta
3. Bombay to Ceylon and China, via Singapore
4. Singapore to Sydney.
The branch is from Maraeilles to Malta.
The first mail for England, under the new contract, will leave Hongkong on the 28th of December, and Calcutta on the 6th of January. The time to be occupied to the various ports from the date of departure from Southsmpton, including all stoppages, is estimated as fallows: — Ghraitar, five days; Malta, 10; Alexandria, 14; Suez, 17; Aden, 22; Ceylon, 24; Madras, 38; Calcutta, 42; Penung, 40; Singapore, 42; Hongkong, 50; Batavia, 46; King George's Sound, 58; Adelaide, 64; Port Phillip, 67; and Sydney, 70 days.
There will be no siteration in regard to the dates of despatch of the Marseilles portion of the mails from London, but by the mail of the 3th of every month there will be a direct communication with Calcutta and also with the Straits and China, thus affording by way of Marseilles a fortnightly postal service between England and the whole of the posta embissed in the scheme, in place of a monthly one.

The first mail under this contract for the Australian ports, viz.,—King George's Sound, Adaide, Fort Pallips, and Sydney, will be despatched from Southampton on the 4th of

March (from London via Marseilles on the 8th), and will be forwarded from Singapore by a steamer leaving that port on the 18th April. The subsequent mails for Australia, by means of this company's steamers, will be despatched on the 4th of every alternate month thereafter, and as the departure of the Royal Australiam Mail steamers via the Cape are arranged for the intervening months, there will be by the agracy of the joint services a monthly steam communication to and from Fugiand and the several Australian ports. The first homeward contract mail will leave Svdney on the 20th of January, to eath the China steamer at Singapore, the mills by which will be due at Southampton on the 6th April next.

proposes to establish immediately a line of steemers between Calcutta and China for commercial purposes, and not under contract for the conveyance of mails. These vessels after arriving at Hongkong will proceed to Shanghai and the northern ports of China, making two tries between Hongkong and those ports every month.

In combination with the large increase of the proposed cp rations of this enterprising company, and the increased facilities for travelling by the overland route, we understand that a considerable reduction is to be made in the tariffs of freight and passage money commencing with the ensuing year, the passage money herastiter being fixed as follows: —To Aden, £70; Bombay, £95; Coylon, £95; Madras, £100; Calcutta, £105; Perang, £105; Sirgapore, £110; Batavis, £120; Hongkong, £130.

The new service will be opened on the 20th of January by the departure of the Indua (which vessel has been greatly accelerated in speed), to be followed on the 4th of February by he new serves exemphin Rengel, 62,100

E120; Hongkong. E130.

The new service will be opened on the 20th of January by the departure of the Indus (which ressel has been greatly accelerated in ane-d), to be followed on the 4th of February by he new screw steemship Bengal, of 2100 tons and 600 horse power, and by the Ripon on the 20th of February. The Ruxine and the Sultan are to occupy the Marseilles and Malta branch till two very powerful paddlewheel steamers, the Vectic and Valetta, of 900 tons and 400 horse power, now building especially for this service are completed.

The company, for the performance of their others, to a spiendid assyrtment of the above

cisely at the stipulated time and date at all the several ports.

The practical monopoly of the overland communication with India and China is now unreservedly in the hands of the Peninsular and Oriental Company. It is no 'ess for the benefit of the company than for the benefit of the nublic service that the greatest pains about 1 be constantly devoted to improving cherpening, and accelerating the route wherever practicable smeliorations present them. It is loss. The are energy of the company in constructing a fleet of new ships, and improving the old ones at vest excesse, is an earnest that no future eff ris will be spared to maintain this immortant and signatic chain of construction in the highest state of efficiency, regularity, and general usefulness.—Times, Dec. 9.

Dec. 9.

Shipwrights, and general useruiness.— Jimes, Dec. 9.

Shipwrights, are stated among the mechanics for an immediate advance of wages, and a sirike, if not acceeded to by the employers. The shipwrights, a most important body in Bristol, have issued the following circular addressed to their employers: "Respected Birs,—We, the operative shipwrights of the port of Bristol, beg to draw your attention to the present commercial enterprise of the country—its consequent action on the mechanic and artizan of every crade—the upward tendenties of all the necessaries and comforts of life—and hope ton will see no inconsistency is advancing them six pence a day on their present rate of wages, to meet the consequent advance of the times. The committeemen of the yard are deputed to wait upon you with this memorial, and an answer is respectfully solicited by Monday next by your obmitent servants. For your prosperity in trade and family they ever pray." The house carpenters and joiners have also issued a similar circular, and it is said that other trades will follow their example. We know not what will be the reply of the employers in the case of the shipwrights; but in the case of the carpenters everal masters have already acceded to the advance. The trade in shipbuilding is at present so brisk that there are not hands enough to do the work.

23 ALLOTMENTS FORSTERVILLE ESTATE, THIS DAY, will be positively LET by public auction, at the Rooms, of R. J. G. COHEN, 490, George-Public attention is particularly directed to this important sale, being the only property in the City which can be brought to public competition. The proprietor will give the most liberal terms at sale.

IMPORTANT AUCTION. A portion of the FOSTERVILLE ESTATE,

Situated between the Sheriff's Gardens and the mansion house and grounds of Mrs. John Terry Hughes; well known as the valuable property of John Smith, Esq., as surveyed and subdivided by Mr. Armstreng, into building portions, will be let.

BY PUBLIC AUCTION, BY TOHN G. COHEN, THIS DAY, Wed-

The streets on this property run parallel with those on the Riley Estate.

There is no doubt that this is one of the most important properties in the city of Sydney, and that now may be made available. The daily increase of our population requires a situation such as this to afford shelter to the thousands who will emigrate to these shores. Parties who may lease these allotments will be enabled to put up buildings in accordance with their means, and they will not be restricted to any particular class or style. There can be but one opinion as regards this property, in its locality being within the city of Sydney, and one of the most healthful situations.

The Sale will comprise

FARM AT BROULER.

BOWDEN AND THRELKELD (successors to George A. Lloyd) have received instructions to sell by auction, at the City Mart, THIS DAY, Wednesday, the 18th Mart at 12 colors.

City Mart, THIS DAY, Wednesday, the 18th May, at 12 o'clock, An excellent little Farm of 61 acres, 2 roods, and 16 perches, in the immediate vicinity of the township of Broulee, bounded on the seuth by the main road leeding into St. Vincent street, as shown on the plan exhibited at the Auction Mart A portion of the well known low swampy land at the head of the township, so suitable for gardens, is contained in this grant.

Broulee has long been famous for the production of wheat and potatoes and dairy produce, and having a road from it direct to Braidwood diggings gives it additional advantages in the disposal of produce not thought of by the original purchasers of the town and suburban allotments.

A plan may be seen and further particulars in the supplying to the auctioneers.

MONDAY. May 23. PROFITABLE INVESTMENT.
£350 PRINCIPAL, at 12 per cent. per
annum, secured on property consisting

of:—
Two Stone Houses, of 4 rooms each, and
Two Stone Houses (unfinished)
Situate in William street. Balmain, and on
which there is an accumulation of interest
since 1844.

DURKIS AND LAMBERT have

been favoured with instructions from the Mortgagee, to dispose of the above by pub-tic auction, at their Rooms, 451, George-street on MONDAY, 23rd instant, at 12 o'clock precisely.

The urgent demand for dwelling

precisely.

The urgent demand for dwelling houses in the city, coupled with the vast secessions to the number of its inhabitants by deily arrivals in port, tends to raise the value of suburban property to a wonderful extent. The auctioneers therefore refrain from giving a tedious panegyrie of the merits of property situace so near to the city as the above, which is delightfully situated at Balmsin, just opposite the Gas Works.

The two finished Houses are occupied by Mr. Manner, and Mr. Fackney, as weekly tenants. The land is described in the deeds as —"All that piece or parcel of land situated in the district of Petersham Hill, in the county of Cumberland, and colony of New South Wales, and being lots 17 and 18 of a sale by J. J. Pescock, in 1841, or thereabouts, commencing at the north-west corner of Lot 16, sold to William Todd; bounded on the North by William-street, being a westerly line of 80 feet; on the West by Lot 19, sold to William Kinnear, being a southerly line of 80 feet; on the South by Edward-street, being an easterly line of 80 feet; and on the East by Lot 16 aforesaid, being a northerly line of 80 feet to the commencing corner.

Prom the high rate of interest payable on

aforesaid, being a normerly line of extending corner.

Prom the high rate of interest payable on the above mortgage (12 per cent.), it is obvious that in the present state of the money market, it would be a first-rate investment for spare capital.

Terms:—One third cash deposit; the residue has an around hills at 3 and 6 months, dated

by approved bills at 3 and 6 months, dated from the day of sale, and bearing aix per cent, interest, secured on the property.

MONDAY, 23rd May. Woolloomooloo Bay.
VALUABLE CORNER ALLOTMENT, near
the Wharf, Dowling-street, at the head of
the Bay, opposite Mr. Hetherington's stope

DURKIS AND LAMBERT have re-ceived instructions to dispose of the above, at their rooms, 451, George-street, on MONDAY, 23rd instant, at 12 o'clock precisely, 1974 instant, at 12 0 ceota precisely, This allotment occupies a most valuable ossition at the corner of Dowling-street and Susar-place, having 40 feet frontage to the former, and 60 feet to the latter, close to the wharf at the foot of Dowling-street, the landing point of arrival and departure for the numerous boats constantly employed in the bay and harbour.

boats constantly employed in the bay and harbour. It is a most excellent spot for business purposes, as good fresh water can be obtained within 5 feet of the surface; and it is impossible to estimate what must be its value in a few years. Improvements around are constantly advancing, and the city rapidly extending in that direction. Since land has been open to the public in that locality, it has been eagerly purchased as fast as it could be brought forward; whilst, from its convenient distance from the busy part of the city, it has ever been a favourise place of residence.

Intending purchasers are referred to Mr. James Heaton, who resides on the adjoining land, and will be happy to show the allotment for sale.

Terms. One half cash descript, the residue.
